# Note Your Life

11613015 刘昊天

11610103 唐德轩

11611226 吴伟鹏

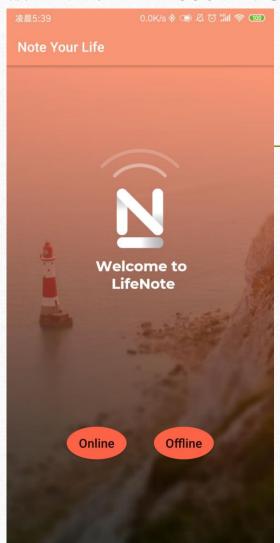

11613021 熊一衡

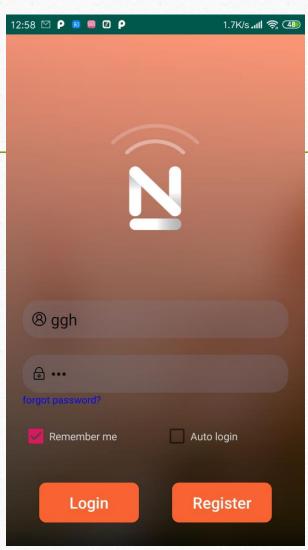

11612618 朱家明

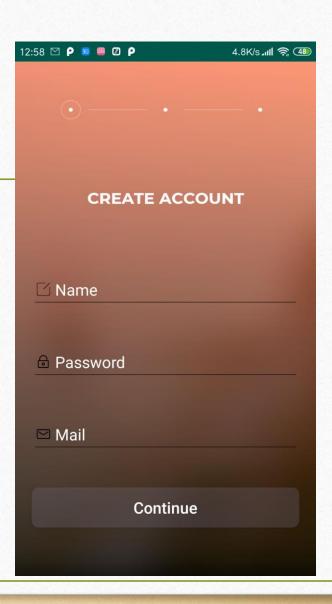

## What APP? --- Overview

- "Note": Note System
  - Create & Delete (Manipulation in local device)
  - Push & Pull (Cloud service)
- "Life": Recognize things around your
  - Cars
  - Flowers (not available now)
  - •

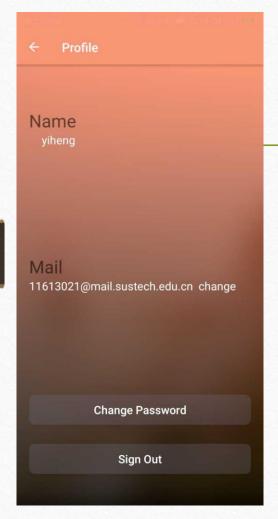

#### What APP? --- Account Service

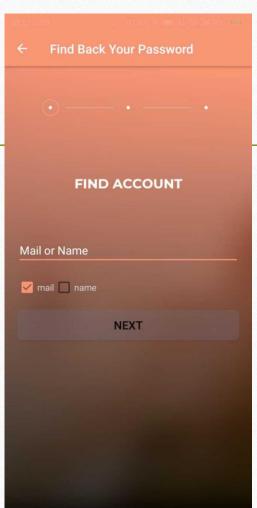

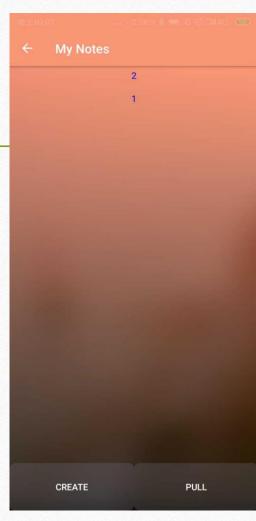

#### What APP? --- Account Service

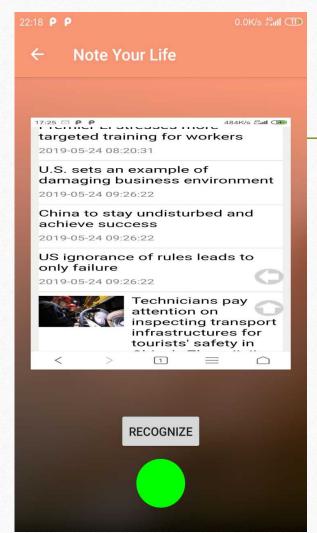

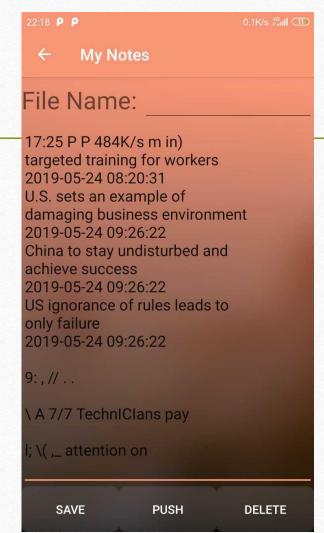

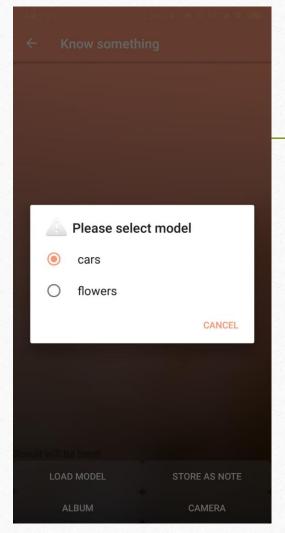

#### What APP? --- Word Recognition (Editable Text)

#### What APP? --- Things Recognition (Editable Text)

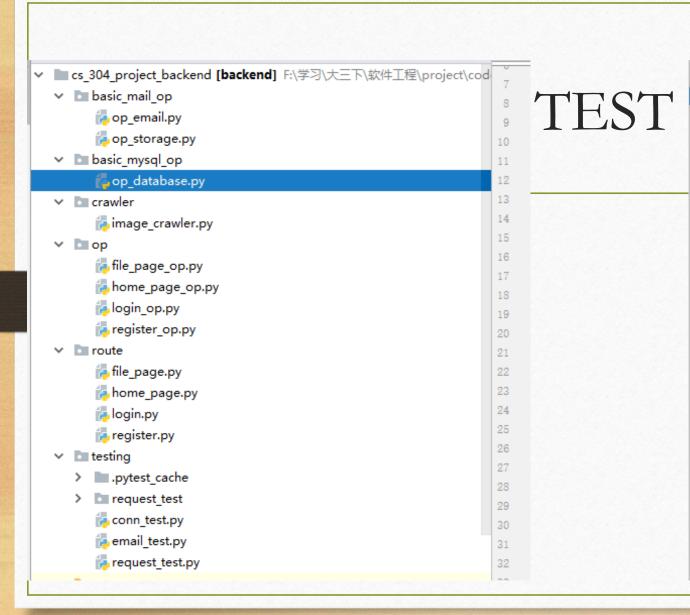

### Where to use?

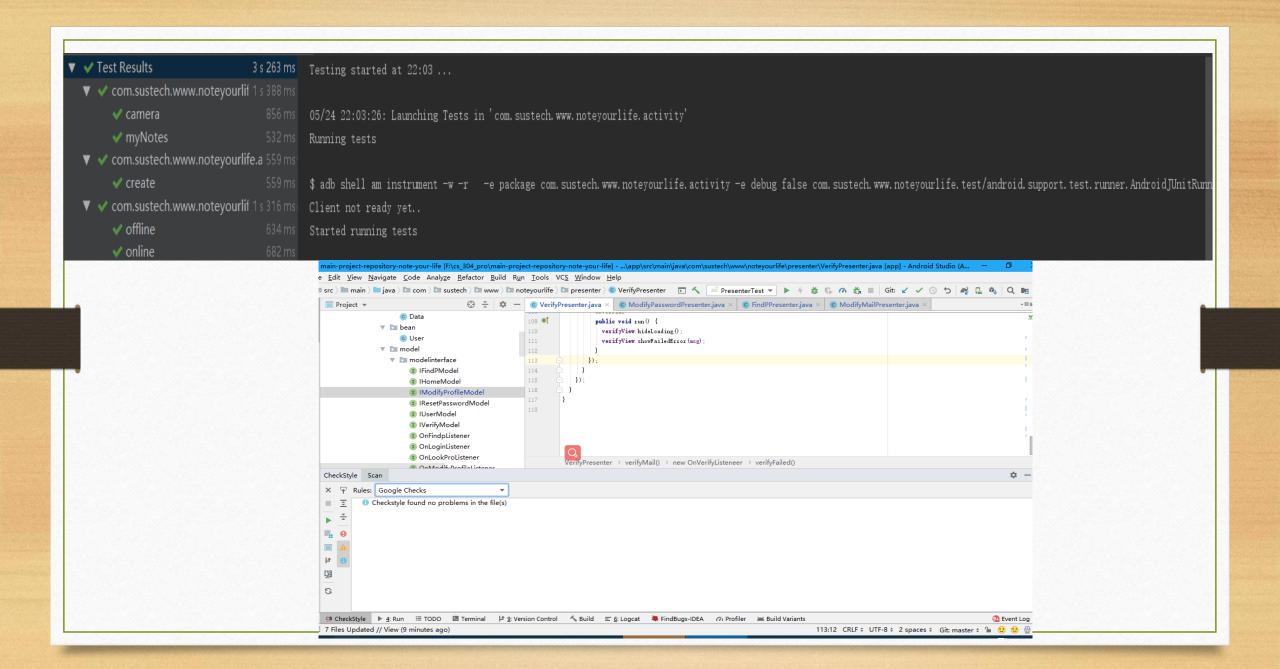

- Save notes in different devices.
- Save things in cloud.
- Transfer images to editable text (Tess-orc) ⇒ Noting words.
- Find out what things around you is (TensorFlow), Then note it!
  - Support only "cars" now.

## What to do Next?

- Cloud Calculation.
- Recognize more things.
- Improve the model.
- Optimize the UI Interface.

# Thanks to SE project --- We've learnt a lot

- MVP design pattern
- Git usage
- Different ways of Test

#### We were hurt a lot

- Incompatibility problem caused by Android fragmentation.
- A dreadful mess of tests implementation.
- The image handling (Bitmap Operation ⇒ File Operation: accuracy)

# What we think – we must do choices!

- This is a software engineering course, we want the project in an engineering way.
- It is EXTREMELY HARD to make tests nearly follow the project procedure.
